

The burndown chart shows clear progress throughout the sprint, with the team completing all planned work ahead of schedule. Progress began on Dec 1, with 12 story points completed (User Stories 1, 2, 3, and 17). By Dec 3, another 11 points were completed (User Stories 9, 13, and 10), followed by 18 points on Dec 4 (User Stories 11, 12, and 15). The sprint wrapped up on Dec 6 with the final 17 points (User Stories 16, 19, 18, and 14).

In total, the team completed 58 story points, significantly higher than the 12 points completed in the previous sprint. The increase in velocity can be attributed to better familiarity with the tools, clearer prioritization, and improved collaboration. Four lower-priority user stories (6, 7, 8, and 20, totaling 32 points) were removed to maintain focus on high-value tasks.

Overall, this sprint demonstrates major improvements in productivity and planning.
