Standup Notes:

1. Nov 7:
   - Hassan: Started setting up the structure for splash screens using Figma designs from Sprint 0.
   - Ahmad: Analyzed Figma designs from Sprint 0 to define assets and interactions needed for splash screens.
   - Ryan: Began designing the layout for the sign-in screen, ensuring alignment with team wireframes.
   - Allen: Started the layout for the sign-up screen, focusing on positioning input fields.
   - Abdulbasit: Absent (Exam Preparation)

2. Nov. 8:
   - Hassan: Continued refining splash screen visuals, focusing on responsiveness across devices.
   - Ahmad: Implemented and tested the first version of swiping interactions between splash screens.
   - Ryan: Added styling and button functionality to the sign-in screen.
   - Allen: Completed the input fields for the sign-up screen, plans to start validation work.
   - Abdulbasit: Reviewed the team's progress asynchronously and provided design feedback via Slack.

3. Nov. 11:
   - Hassan: Debugged and polished splash screen animations for a smoother user experience.
   - Ahmad: Finalized transitions between the splash screens and linked them to the main app thread (app.tsx)
   - Ryan: Continued refining the sign-in screen's design for better interactivity.
   - Allen: Absent (family commitment)
   - Abdulbasit: Expanded input validation functionality for the sign-up screen.

4. Nov. 13:
   - Allen: Expanded input validation functionality for the sign-up screen.
   - Ahmad: Enhanced swiping functionality to handle edge cases and tested navigation flow.
   - Ryan: Worked on responsiveness and cross-device compatibility for the sign-in screen.
   - Allen: Continued improving form validation for the sign-up screen.
   - Abdulbasit: Focused on reviewing navigation consistency across the app.

5. Nov. 15:
   - Hassan: Absent (Labtest)
   - Ahmad: Absent (Labtest)

- Ryan: Revisited sign-in screen design.
- Allen: Fixed minor bugs in the swiping functionality and adjusted animations.
- Abdulbasit: Collaborated with Ryan, providing design suggestions for the sign-in screen

6. Nov. 18:
   - Hassan: Reviewed splash screens with the team, minor adjustments were discussed
   - Ahmad: Began documentation of the swiping functionality (in case it is used for future reference)
   - Ryan: Absent (missed standup due to an assignment deadline)
   - Allen: Enhancing sign-up form interactions and styling
   - Abdulbasit: Focused on ensuring seamless transitions between the sign-in and other screens.

7. Nov. 19:
   - Hassan: Made final updates to splash screens based on review feedback
   - Ahmad: Completed design for swiping functionality and navigation
   - Ryan: Made final updates on the sign-in screen design
   - Allen: Polished the sign-up screen design and prepared it for demo
   - Abdulbasit: Continued focusing on ensuring seamless transitions between the sign-in and other screens.

8. Nov. 20:
   - Hassan: Presented splash screen functionality and designs during the sprint review in preparation for tomorrow's demo
   - Ahmad: Demonstrated swiping functionality and navigation transitions in preparation for tomorrow's demo
   - Ryan: Showcased the responsive design of the sign-in screen in preparation for tomorrow's demo
   - Allen: Showcased sign-up form and its functionalities in preparation for tomorrow's demo
   - Abdulbasit: Summarized all the feedback given by each of the members, in preparation for the next sprint
